

Efficient Plumbing = Happy Customers

Use our exclusive **PIPE BURSTING** method

Bamberg Plumbing and Excavating has great news for plumbers!

Our exclusive method meets ALL Illinois plumbing codes!

You no longer have to rip up an entire lawn to replace a sewer in your customer's yard. At Bamberg Plumbing and Excavating, we use the latest innovative equipment to dig a 4' x 4' hole, and then a hydraulically powered cylinder pulls a bursting head through the existing line. A seamless, high-flow, code-approved, high-density polyethylene pipe simultaneously replaces the burst pipe.

Our trenchless pipe repair and replacement system:

- Allows 2" to 6" pipe replacement and can even upsize from 4" to 6" pipes
- Replaces unlimited lengths in 100' sections at a time
- Pulls through three, 45 degree bends
- Provides safer installations
- Makes your customers happy

**We want to help you grow your business. Let's get started.
